How the Ticketing Process Works

TICKITO PAPERLESS TICKETING & GATE MANAGEMENT - UNLOCKING FAIRNESS AT EVERY GATE

Online Vending

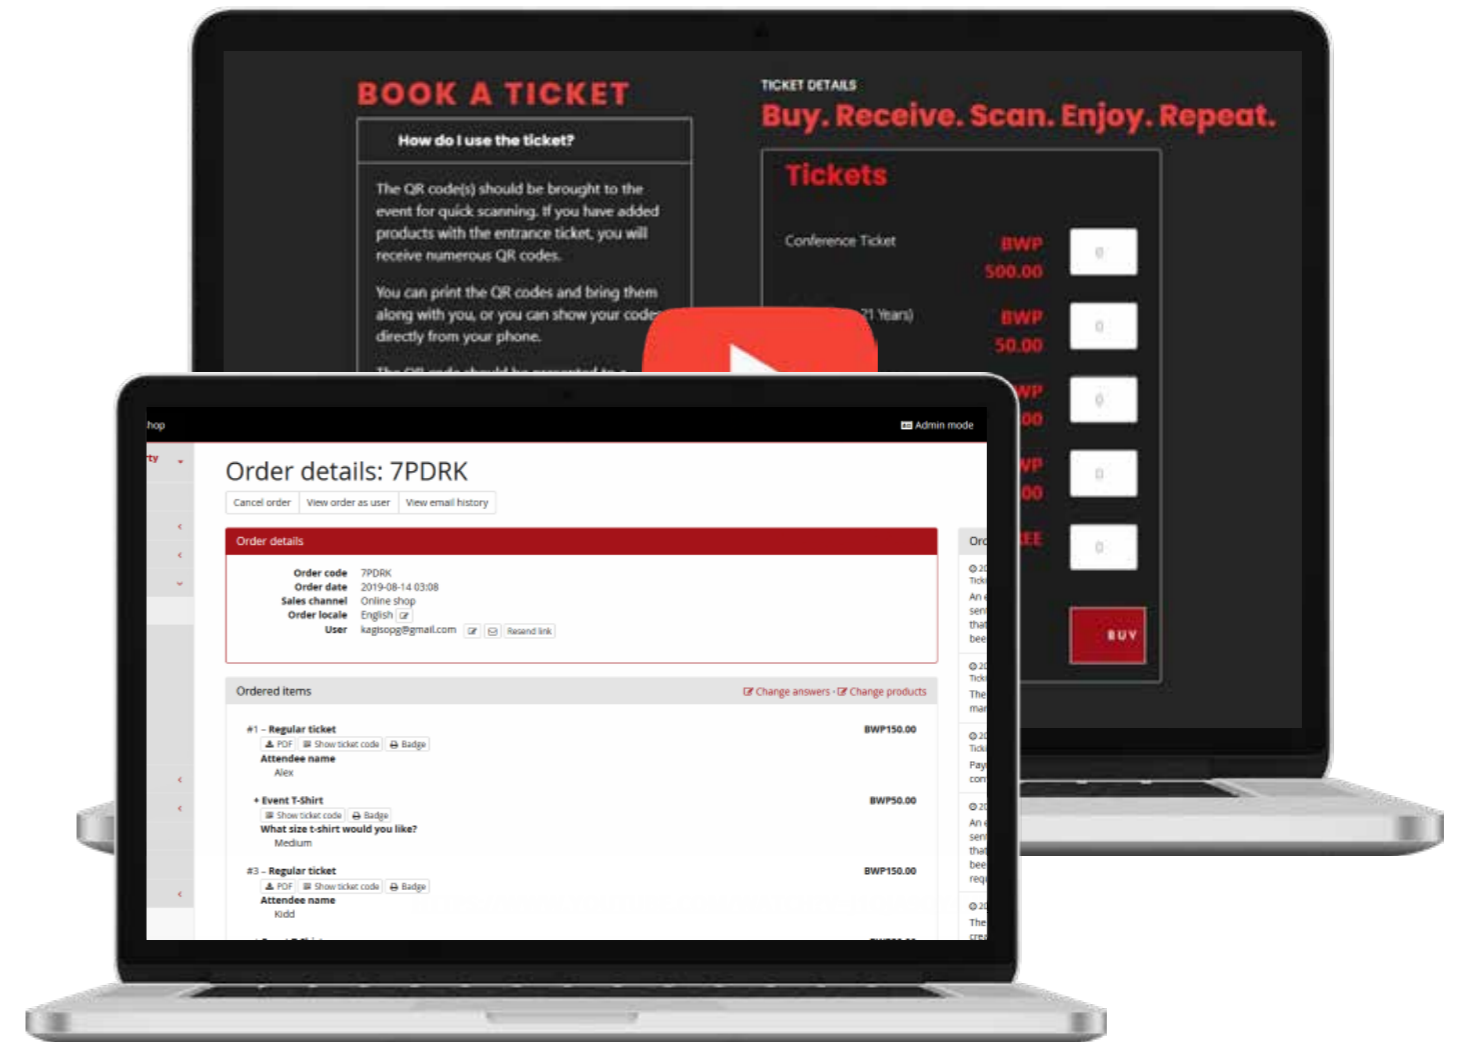

01 ONLINE VENDING

The online vending process for Tickito is designed to be seamless and convenient for event attendees. Here's a step-by-step breakdown of how it works:

1. Visit the Tickito website or scan the provided QR event code to access the online vending platform.
2. Browse and select the desired event from the available options.
3. Enhance your ticketing experience by selecting add-ons such as merchandise, coupons for alcohol, or any other additional offerings available for the event (if set by the vendor)
4. Provide the necessary details of the guests attending the event, including their names and contact information.
5. Choose from multiple payment options available:
 - Pay later at the gate to reserve a ticket (if applicable).
 - Pay online using a credit or debit card securely.
 - Pay using a mobile money app via an e-wallet or Orange Money.
6. Confirm the payment and proceed to the next step.
7. If you've chosen to pay online, enter your card details securely to complete the transaction.
8. Receive an immediate confirmation of your order placement through SMS and email, ensuring that your ticket reservation is secured.
9. If you've paid online, you will also receive a confirmation of payment via SMS and email (confirmation of payment). If you've chosen an offline or gate payment option, you will receive instructions on how and when to make the payment.
10. As the event approaches, receive your ticket as a PDF attachment in your email. The ticket will include a unique QR code, serving as your entry pass on the event day. Simply present the ticket with the QR code at the gate for a hassle-free check-in experience.

With Tickito's online vending process, purchasing tickets and accessing event details has never been easier. Enjoy the convenience and efficiency of securing your spot and receiving your ticket electronically, ensuring a smooth and enjoyable event experience.

If you have any questions or need further assistance with the online vending process, our dedicated support team is available to assist you at any step along the way.

The System

- Advanced encryption and secure payment gateways for safeguarding revenue
- Unique identifiers such as QR codes and barcode scanning to ensure ticket authenticity
- Strict authentication processes to prevent counterfeit or duplicated tickets

Gate Vending

02 PHYSICAL VENDING

The physical ticketing process for Tickito ensures a smooth entry experience for customers attending events. Here are the steps involved:

1. Upon arriving at the gate, the customer presents their ticket for scanning or verification.
2. If the customer already has a ticket, it will be scanned to validate its authenticity and grant entry.
3. In the case where a customer does not have a ticket, they can select a ticket at the gate. The customer then proceeds to make the payment for the ticket.
4. Once the payment is completed, the customer receives an SMS and email confirmation, serving as proof of payment.
5. Along with the ticket confirmation, the customer is given a wrist tag. The wrist tag acts as a visual indicator that the customer has gained entry to the event.
6. As the customer enters, their entry is recorded in the indelible log of the Tickito system. This ensures accurate attendance tracking and provides organizers with a comprehensive record of attendees. YOU WILL THEN BE ABLE TO VIEW ACCESS LOGS AND REPORTS IN REAL-TIME, AND EASILY EXPORT THE DATA FOR FINANCIAL RECONCILIATIONS.

By implementing this physical ticketing process, Tickito aims to streamline entry procedures and provide a secure and efficient experience for customers. The combination of ticket scanning, payment verification, and wrist tag issuance enables a smooth flow of attendees while maintaining an accurate record of entry for event organizers.

Our scanning system prevents double-entry

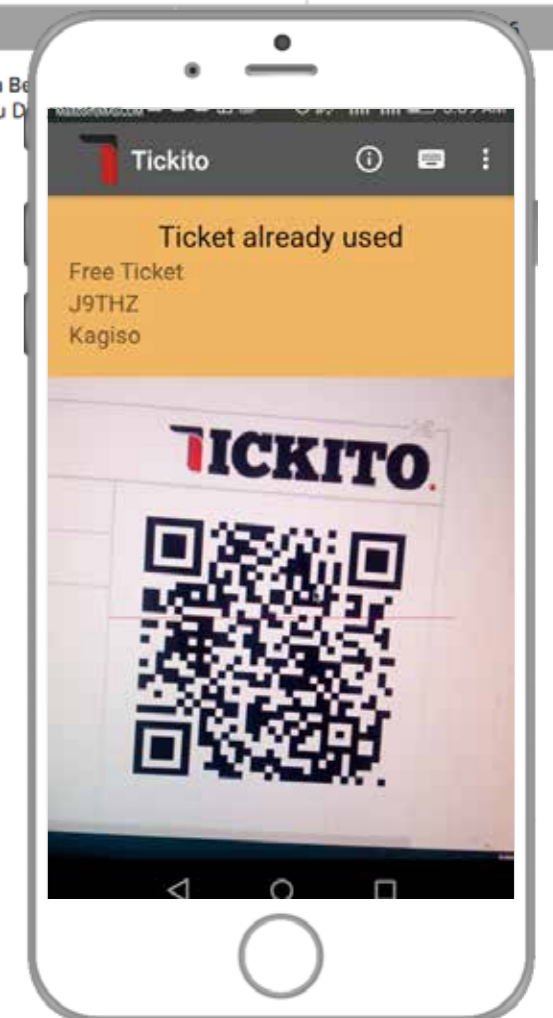

There is NO need for providing physical tickets at the gate

All entrants at the gate will be recorded with the contact details captured

Get a contact database of all event entrants - useful for targeted marketing for your next event
